New patient brochures for Inogen One , January 2009

MedSupport Europe (MSE) has experienced the need for patient brochures on the Inogen One portable oxygen concentrator in the local language over the past years. Initially MSE made use of US-made brochures which were used to inform all interested contacts.

In many cases potential users strongly prefer to have product literature in their local language.

Therefore MSE has produced a colourful Inogen One brochure in English, in French, in German and in Dutch.

The brochure summarises the key features and benefits of the portable oxygen system very well.

Please contact MedSupport Europe at www.medsupporteurope.com or via e-mail at info@medsupporteurope.com for a copy of the brochure or for more details.

The brochure can be downloaded from the MSE website.
